Zynk Protocol — Private LP Opportunity via Mezen Capital

DISCLAIMER. *This communication is private and confidential and is intended solely for the named recipient(s). Any review, use, disclosure, copying, or distribution of this communication by or to anyone other than the intended recipient is strictly prohibited. The information contained herein does not constitute an offer or solicitation in any jurisdiction where such offer or solicitation would be unlawful.*

Zynk (https://www.zynk.money/) is a payment infrastructure protocol that provides just-in-time stablecoin liquidity to remittance services, cross-border payment processors, and OTC desks. These companies must pre-fund transactions to offer timely settlements, forcing them to lock up capital or rely on expensive credit lines. Zynk solves this by borrowing USDT/USDC from LP vaults to instantly settle transactions at the destination, while incoming fiat is simultaneously converted to repay the vault, with each loan cycle completed within hours to days.

Mezen Capital has negotiated a private liquidity provisioning arrangement with Zynk:

- *Amount:* up to $20M USDC deployed into a dedicated vault
- *Soft lock-up:* 3–12 months,
- *Total APR:* **17–19% APR** (cash settlement) or **19–21% APR** (SAFE + put option at Zynk's next funding round),
  - **13% p.a. paid out weekly** from day one and the remainder due at maturity.

Deployment deadline - 29 May.

	3M	**9M**	**12M**
Cash Option			
Total APR (cash)	**17%**	**18%**	**19%**
Weekly payment	$2,453	$2,453	$2,453
Cash payment at end of period	$10,000	$37,500	$60,000
SAFE+Put Option			
Total APR (SAFE + Put)	**19%**	**20%**	**21%**
Weekly payment	$2,453	$2,453	$2,453
SAFE Value at Put Option Strike	$15,000	$52,500	$80,000
**Cash or SAFE+Put option choice - at the discretion of the protocol*			

Key Investment Points:

- Credit exposure is at the individual transaction level — each loan cycle completed in hours to days, funds contractually restricted to end-user settlements only.
- Protocol runs on fully audited Solana smart contracts,
- Mezen approved Client List, early redemption rights in the event of covenant breach or Material Adverse Effect.

Team & Backing:

Founded by the ex-CTO of Amazon Pay, a Morgan Stanley London web3 veteran (10+ years), and a Harvard MBA. Backed by **Coinbase Ventures, Hivemind, Alliance DAO, Polymorphic Capital, Tykhe Ventures**, and Contribution Capital.
