OUR PRODUCTS

Mortgage Data Marketplace

Access secure digitized mortgage records as transparent fungible digital assets.

Pineapple Prime

COMING SOON

Access market leading yields backed by mortgages onchain.

WHY PINEAPPLE TOKENIZATION

From paper files to programmable, trusted assets.

From Paper to Programmable Assets

We transform static mortgage documents into tokenized, metadata-rich assets—fully auditable, instantly verifiable, and ready to power next-generation financial applications.

Radical Efficiency

Tokenization compresses weeks of back-office processing into automated on-chain flows. Underwriting, verification, and reconciliation become faster, cleaner, and programmable.

Mortgage Data Marketplace

Structured mortgage intelligence as a compliant, tokenized asset. Institutions and AI models gain access to institutional-grade analytics without compromising privacy.

Democratized Mortgage Yields

Pineapple Prime transforms institutional mortgage yields into programmable on-chain opportunities—opening access to a new class of global participants.
